

We build, market, and maintain compelling Web sites that exceed our clients' expectations. Inspire Design provides Web marketing strategy, Web design, writing, search engine optimization, hosting, mixed print and Web graphics, custom programming and application development.

| | Our Capabilities | Examples of Our Performance |
|----------------------------|---|--|
| Internet Savvy | We understand the net and build sites that meet users' needs and search engines rank highly. | For five years, <i>6seconds.org</i> has stayed in the "top 10" search result listings on major engines. <i>sandrockfarm.com</i> gets 85% of its business via the site we built and market. |
| Business Sense | Your web site is an extension of your business, so we begin by understanding your business/organization needs, and build functions that support and enhance the way you work. | For <i>essisystems.com</i> , we launched e-commerce plus a custom application to create return visitors and drove 35% of their business via the Web in under a year. |
| Marketing Expertise | We create a Web marketing strategy that ties to your other marketing to meet business objectives. | Our sites and marketing increased Web inquiries for <i>cedu.com</i> by 300% in 6 months. We filled a 500-person conference through Web marketing with <i>nexuseq.com</i> . |
| Fast Turnaround | Give us whatever you already have written, discuss requirements and preferences, we will write, design, and build so you have a functional prototype in two to three weeks. | We built <i>qmetricseq.com</i> in less than ten days, and <i>heartskills.com</i> in five days. |
| Cost Effective | We're used to working with small companies and nonprofits, so we know how to create a lot of results for a reasonable investment. | <i>Kidseq.com</i> , <i>lakechamplaincommittee.com</i> , and <i>artofthegoodlife.com</i> are just three examples of sites where we were under budget. |

If you are looking for excellent web design and marketing at an exceptional value...you found it.
